

```
#include <iostream>
using namespace std;
// Uppgift 3
int main(int argc, char** argv)
{
    setlocale(LC_ALL, "swedish");
    string s, dels;
    cout << "Mata in din text:" << endl;
    getline(cin, s);
    cout << "Mata in tecken att leta efter:" << endl;
    cin >> dels;
    int hitta = s.find(dels, 0);
    s = s.substr(hitta, 4);
    cout << "\"" << s << "\"" << " plockas ut!" << endl;

    return 0;
}
```
