

```
#include <iostream>
using namespace std;
// Uppgift 4
int main(int argc, char** argv)
{
    setlocale(LC_ALL, "swedish");
    int t,m,s;
    cout << "Mata in timmar, minuter och sekunder. Använd heltal" << endl;
    cout << "Timmar:";
    cin >> t;
    cout << "Minuter:";
    cin >> m;
    cout << "Sekunder:";
    cin >> s;
    s = s + m*60 + t*3600;
    t = s / 3600;
    s = s - t*3600;
    m = s / 60;
    s = s - m*60;
    cout << "Den inmatade tiden motsvaras av " << t << " timmar, " << m << " minuter och " << s << " sekunder" << endl;

    return 0;
}
```
